Highly self-driven with strong initiative, skilled in discerning client needs and identifying problem areas to develop unique, efficient solutions through active listening and critical thinking.

RELEVANT EXPERIENCE & PROJECTS

Dedan Kimathi University   2021 - 2024
Academic Projects & Leadership

- Project Management: Applied business information strategies to identify operational challenges and developed unique technological solutions to resolve them.
- Networking & IT: Gained practical skills in networking protocols and hardware configuration under the guidance of Cisco certified instructors.
- Software Development: Utilized coding skills to create a Farmers app that streamlined Sales and communication for the farmers.

Kalimoni Mission Hospital   October 2024 – December 2024
IT Department Internship

- System Maintenance: Assisted in the maintenance and updating of the Hospital Management Information System (HMIS), ensuring accurate patient data entry and retrieval for efficient service delivery.
- Network Administration: Monitored local area networks (LAN) and Wi-Fi connectivity across various hospital departments, troubleshooting downtime and optimizing signal strength.
- User Training & Assistance: Oriented new staff on the use of hospital IT resources and software, promoting digital literacy and reducing system usage errors.
- Hardware Management: Performed routine maintenance and repairs on computers, printers, and medical IT equipment, extending hardware lifespan and reducing replacement costs.
