

ONESMUS MUSEMBI

JUNIOR FRONTEND DEVELOPER

PROFILE

Versatile Software Engineer with a strong focus on front-end development and designing intuitive, user-centric interfaces. Proficient in leveraging JavaScript (ES6+), React, and modern CSS to build responsive web applications. A highly self-driven problem-solver eager to learn new frameworks like Lit and apply modern development practices to deliver scalable, real-world digital solutions.

EDUCATION

2021 - 2024
DEDAN KIMATHI UNIVERSITY OF TECHNOLOGY

- Bachelor of Science in Business Information Technology

SKILLS

TECHNICAL STACK

- Front-End: HTML5, CSS3, JavaScript (ES6+), React, TypeScript (Learning/Basics)
- Back-End: Java, Python, Server-Side Logic.
- Databases: SQL, Database Design, Data Integrity.
- Networking: Cisco Configuration, LAN/WAN.
- Version control: Git and Github

PROFESSIONAL SKILLS

- Project Management & SDLC
- Technical Research & Reporting
- Database Management
- Troubleshooting & Diagnostics
- Stakeholder Communication
- Responsive Design

RELEVANT EXPERIENCE & PROJECTS

Dedan Kimathi University 2021 - 2024

Academic Projects & Leadership

- Project Management: Applied business information strategies to identify operational challenges and developed unique technological solutions to resolve them.
- Networking & IT: Gained practical skills in networking protocols and hardware configuration under the guidance of Cisco certified instructors.
- Software Development (Farmers E-Commerce & Communication App): Front-End Development: Architected a responsive user interface using React and CSS3, ensuring seamless navigation for farmers across both mobile and desktop devices.
- State Management & Logic: Implemented JavaScript (ES6+) to manage dynamic product listings and real-time communication features between farmers and buyers.
- Problem Solving: Streamlined the sales workflow by identifying bottlenecks in traditional agricultural manual records and digitizing the transaction process.
- Version Control: Managed the codebase using Git and GitHub, following organized branching workflows to track feature updates and bug fixes.

Kalimoni Mission Hospital October 2024 - December 2024

IT Department Internship

- System Maintenance: Assisted in the maintenance and updating of the Hospital Management Information System (HMIS), ensuring accurate patient data entry and retrieval for efficient service delivery. Contributed to the backend logic for patient data retrieval, ensuring HIPAA/Data privacy compliance standards were met in code structure.
- Network Administration: Monitored local area networks (LAN) and Wi-Fi connectivity across various hospital departments, troubleshooting downtime and optimizing signal strength.
- User Training & Assistance: Oriented new staff on the use of hospital IT resources and software, promoting digital literacy and reducing system usage errors.
- Hardware Management: Performed routine maintenance and repairs on computers, printers, and medical IT equipment, extending hardware lifespan and reducing replacement costs.
